## **MAG Foundation – Time for change**

**The MAG Foundation** is a registered charity and has been set up to provide a new dimension in motorcycle and scooter safety and research. The Foundation is privileged to have Chief Superintendent David Short and John Moss retired head of safety for Cheshire County Council, as its patrons.

The aims and the objectives of the Foundation are to protect and promote motorcycling through: Research – Promotion – Sponsorship, for the public benefit and to raise awareness and understanding of environmental road safety and security issues relating to the use of motorcycles and scooters.

The Foundation aims to use its research to represent the opinions of the motorcycling community as a whole and offer sound information to government, the industry, other riders' organizations and the motorcycling press.

Over the last two years, safety has become more and more an issue with government, the European Union and now, global transport safety is under the authority of the World Health Organisation. We don't know how this will affect us, but we need to be prepared with the right answers. We need to make sense of the facts and figures so that we can make informed decisions for the benefit of the motorcycling community.

Motorcycle theft is a big issue with riders and the Foundation's first seminar in 2004 concentrated on this topic to give the participants a deeper understanding of the issues relating to the identification and examination of stolen motorcycles and how to work with other organisations to combat this problem.

The secure parking booklet represents another milestone for the Foundation and aims to provide information not just for riders, but for councils that do not provide secure parking for motorcycles or so that they can improve their existing facilities. This first edition covers most of the country; each council was contacted and further information was provided by numerous other sources.

We are aware that there may be parking areas that are not included. If you have further details about secure parking, please let us know, or if you require any information regarding the MAG Foundation, contact us at

on behalf of The MAG Foundation

## **A word from our patron**

**As motorcyclists** we are more vulnerable than car drivers to the theft of our vehicles. Bikes are much smaller than cars and therefore it is much easier for the criminal fraternity to bundle them into the back of vans and leave without trace. The financial loss and inconvenience caused by the theft of a bike is only part of the story. As motorcyclists I think we are much more emotionally attached to our bikes than motorists are with their four wheeled tin boxes. Cars are a means to an end, literally a vehicle to get from point A to point B, motorbikes on the other hand are more of an extension to our character and soul.

Therefore the loss of our 'pride and joy' runs much deeper. The chances of getting motorbikes back is significantly lower than four wheelers, bikes are easily broken up and recycled by unscrupulous dealers and equally dodgy buyers.

It is therefore imperative that as a group, the voice of MAG is heard. Great steps have already been taken in advising local authorities to provide safe and secure parking areas in towns. The provision of CCTV and improved street lighting also adds to security. The more obstacles that are placed in the path of the criminal the more likely he is to be put off. This 'target hardening' together with intelligence led directed policing is having an impact on criminal gangs who are being brought to justice and their networks disrupted.

As individuals we too can reduce the risk of bike theft. Quality locks, approved alarms and immobilisers combined with secure garaging at home will all reduce the risk of motorcycle theft.

We do have the upper hand. In my thirty years of policing experience there is one common denominator with criminals, they are all thick and cowardly. Like the 'Hyena' advert used some years ago to combat vehicle crime they can be easily scared off by simple common sense measures, (something which they are short of!).

I am proud to be a patron of the MAG Foundation and this secure parking handbook is an excellent initiative which will make an impact on motorcycle theft and will reduce your risk of becoming a victim of crime.

Bike Safe and enjoy your pride and joy. Look after it and it will look after you!

### **David Short**

Chief Superintendent – North Yorkshire Police  
MAG member 121503

## **Make sure it doesn't happen to you**

A few tips to reduce your machine's vulnerability when you're out and about.

### **1. Where**

Firstly choose the best place to park. If there is a proper secure motorcycle parking facility available then choose that first. If not, park in a well-lit area, where there is plenty of pedestrian traffic and in an area covered by CCTV. Thieves can be deterred from acting where they might be seen. If it's somewhere you can see from your office window, even better.

### **2. Locks**

Locks act to deter as well as prevent theft. Get a lock that can secure your machine to something immovable, then it can't just be picked up and taken away. Get the best quality you can afford and use it. It's no good sat in the garage if you've taken the bike to work. A small tail pack on the pillion seat can help make this more convenient and some locks are designed to fit under seats or come with holders.

Don't leave your lock behind when you leave, it can be discreetly tampered with overnight so that your machine can be removed in seconds during the day.

A lock will provide best protection when used off the ground, that way it's more difficult for a thief to cut it or smash it. Your insurance company may give you a discount for certain locks.

### **3. Alarm/Immobilisers**

Consider getting a combined alarm and electronic immobiliser fitted professionally. They can act as useful deterrent to theft or highlight an attempted theft. Your insurance company may also give you a discount on your premiums.

### **4. Steering Lock**

Don't forget to use this as well. The more things you do the better.

### **5. Kit**

Don't leave your helmet or other belongings on the bike.

### **6. Don't get complacent.**

It's easy to get lazy about locking your bike especially if you're not stopping somewhere for long but it's really not worth the risk.

A few moments making sure it's locked properly is better than the hassle of having it nicked. The more preventative measures you take, the less attractive your machine becomes to a thief.

### **More Info.**

You can get more information about alarms, immobilisers and other security devices by phoning the Vehicle Security National Helpline on 0870 5502006.

For details of approved security features and devices visit Sold Secure **[www.soldsecure.com](http://www.soldsecure.com)** or Thatcham **[www.thatcham.org](http://www.thatcham.org)**.

For more general info visit **[www.secureyourmotor.gov.uk](http://www.secureyourmotor.gov.uk)** or your local motorcycle or scooter dealer.

## **Get Secure Parking**

If there is no secure parking for motorcycles and scooters in your area and you would like the local authority to provide some, don't be afraid to ask. Refer them to the Institute of Highway Incorporated Engineers new Best Practice document 'Guidelines for Motorcycling' which is available from **[www.ihie.org.uk](http://www.ihie.org.uk)**.

This document contains information about how to site, design and fund good quality secure parking facilities

## **Glossary of Terms**

**Secure** – Facilities to secure the motorcycle to, i.e. rails, ground anchors, hoops or units.

**CCTV** – Area covered by CCTV cameras.

**Bike Area** - Dedicated motorcycle bays or area.

**Free** – Facilities are free to motorcyclists.

**24 Hrs** – 24 hour access to facilities.

## **Disclaimer**

To the best of our knowledge, the information provided by councils for this booklet was correct at time of printing.

NB: Any entries listed as: 'No specific details given by council' mean that the council has stated that bike parking is available but not what kind, especially in the case of more rural towns and villages.

## **BikeSafe – Bridging the Gap**

**BikeSafe** is a police led initiative that is run by police forces throughout the United Kingdom. Our primary function is to give riders an insight into more advanced riding skills and to encourage riders to take up post test training.

### **We are about Bridging the Gap into further training.**

The scheme commenced in 1997 as part of the 2000 casualty reduction initiative with 13 forces participating. By 2006 this has grown to 36 forces participating, with approximately 5,500 people attending 'BikeSafe' sessions annually.

The Department for Transport currently supports BikeSafe through their "Think!" campaign and particularly through the provision of stands at 'British Super Bikes' events. You are welcome to come and talk to us at any of the 2006 BSB meetings.

We work with the whole of the biking world to not only help lower the number of motorcycle related casualties on our roads but to encourage and promote better, more enjoyable motorcycling.

BikeSafe offers assessed rides and full day assessment courses at various locations across the country. We provide riders with constructive feedback on their riding ability in a non judgmental, non confrontational environment. By passing on their skills and experience police motorcyclists, and other suitably qualified motorcyclists, will help you become a safer more competent rider who will gain more benefit from your bike.

### ***We also know from feedback received that BikeSafe courses are enjoyable and fun!***

There is no doubt that most people will be better riders at the end of a BikeSafe course, however our sessions are not intended as a substitute for professional training and we actively encourage course attendees to go on to take further training with recognised training providers.

On average you should expect to pay £50 for a full day BikeSafe course. However, local subsidies apply in a number of areas that reduce this cost even further. Short assessed rides are usually free of charge.

If you want to find out more about BikeSafe then please either visit our website – [www.biksafe.co.uk](http://www.biksafe.co.uk) or phone our national number 08452 3074071

### ***Remember ... The best performance modification you can make to a motorcycle is to improve the skills of the rider!***
